

# 2023 PRODUCT LINE

## What Is Intercept Technology™?

The anti-tarnish products from Intercept Silver & Jewelry Care incorporate Corrosion Intercept® and Static Intercept®, Lucent Technologies patented polymers that react with and permanently neutralize corrosive

gases that lead to corrosion and tarnishing of metals, both precious metals as well as other metals used in silver and jewelry products.

Use Intercept Silver & Jewelry Care products to protect all your precious metals from tarnishing including sterling silver, gold filled and low karat gold.

## Anti Tarnish - Static Intercept® Tabs and Strips

Anti-tarnish tabs and strips are the perfectly safe and economical way to protect silver, gold, and other metals from tarnish and corrosion during shipping and storage for up to 12 months. They will not scratch or harm any metals or gemstones.

Simply insert the tabs or strips into jewelry boxes, pouches, or zip-lock bags and let them do the work!

Fabric Pouch

## Anti Tarnish - Corrosion Intercept® Translucent Zip Bags

Corrosion Intercept bags provide affordable long-term storage for any silver & gold items that may tarnish. The bags have a translucent film on both sides to allow thorough viewing of your item(s) inside. They protect items from tarnish for up to 3 years. When the copper color begins to turn gray or black, it is time to change the Intercept package.

## Anti Tarnish - Corrosion Intercept® Translucent Zip Bags

**CI101215**  
10x12" Anti Tarnish  
Zip Bag

**CI14160T**  
Clear 14x16" Anti  
Tarnish Bag (No Zip)

**CI202410H**  
20x23" Anti Tarnish Zip Bag

## Anti Tarnish Poly Tray Covers - Corrosion Intercept®

**CIT180714**  
12mil 7x14" Anti Tarnish  
Poly Tray Cover

Anti Tarnish Poly Tray Covers prevent tarnish of your jewelry for up to 12 months. The cover works by absorbing and neutralizing tarnish-causing gases without leaving any deposits on items it protects. The cover has a built in saturation indicator - when the cover begins to change to a gray or black color, it's time to replace it with a new one. Trim the cover as needed to fit half-size trays. Corrosion Intercept is non-toxic, non-abrasive, recyclable and environmentally friendly.

## Intercept Foam™ - Anti Tarnish Pad Inserts

**IS110623P**  
2.55x3.55" Anti Tarnish  
Foam Pad Inserts

Intercept Foam™ eliminates the need for oils, chemicals, and other coatings to protect your precious metal items from tarnish and corrosion. Intercept Foam™ is the next evolutionary step for applications such as cabinets, drawers, showcases, compartments, larger boxes, etc. Intercept Foam™ has a massive sponge-like surface area, which absorbs and neutralizes harmful gases in enclosed spaces. A color change from copper/dark brown to light gray acts as an indicator that the pad needs to be replaced. Each foam pad typically protects 30 cubic feet of enclosed space for up to 1 year. For larger spaces simply add additional pads.

## Intercept Complete Cabinet Filtration Unit

**IS1106**  
Tarnish  
Prevention  
Complete  
Filtration Unit

**IS1106F**  
Filtration Replacements  
(3 Pack)

The Intercept Complete Cabinet Filtration Unit provides perfectly safe, non-toxic protection for all metals and gemstones in jewelry showcases and storage areas. Simply place the unit in a showcase—hide it behind a tray or display pad. The ICF Filter unit comes with 1 Corrosion Intercept® filter pad for neutralizing atmospheric pollutants. Filter pads and batteries should be changed approximately every 90 days. Additional filter pads can be purchased on our products page. Runs on 2 "D" Batteries (not included).
